Without Wires

310 MARK II BLUETOOTH | WIRELESS BUSINESS HEADSET WITH NC MICROPHONE

Wireless Calls

310 MARK II SERIES

The best-selling and most versatile business headset from Accutone® just got a whole lot better. Mark II of the 310 Series is now wireless, using the latest bluetooth 4.1 version. At only 60 grams, BT310-MKII continues the series' tradition of comfort and lightweight, with features like leatherette headband, high-grade foam cushion, 310 is designed for extensive professional usage.

Compatible with your smartphone, tablet and notebook, the BT310-MKII is one headset for multiple wireless connections. A full charge will last you 8 hours continuous talk-time, but recharging is fairly quick and convenient via micro-USB jack. Simple digital controls allows interactive volume adjustments, answer/end calls and Siri activation when using any iOS devices.

Different from most bluetooth headsets in the market, BT310-MKII is 100% professional grade, despite it being wireless. Using a proprietary Voice-Enhancing 28mm loudspeaker and a premium-grade passive Noise-Cancelling microphone in a uniquely designed single chamber microphone housing, the acoustics meets the strictly requirements of call centers. Other features, typical of Accutone's standards, includes extendable headband, bendable and rotatable microphone boom, comfortable headrest and optional leatherette cushion.
